Dear Parents

Just a reminder that we tweaked the evaluation process a bit in an effort to help the evaluators more accurately identify the players for the "A" team and to put together teams of equivalent talent for grades with enough players for two "B" teams.

Beginning with the girls' basketball evaluations, the Athletic Board instituted this new evaluation process. This process will be used for all gym sports where evaluations are required to divide the players into "A" teams and "B" teams. As such these modifications will only affect grades six through eight.

Our new evaluation process will be conducted over two nights. The first night of evaluations will consist of all the players who signed up to play. The group will then be reduced for the second night of evaluations based on the performance during the first night. The players who will be brought back for the second night will be evaluated a second time. These players will be notified before the second evaluation. Following the second night of evaluations, the "A" team will be chosen, and the "B" teams will be determined by evenly dividing the players between the respective "B" teams.

If you have any questions or concerns please contact the coordinators the particular sport. Their contact information can be found on our new website; www.sjfsathletics.net
