

### Sixth Grade Science Class

The textbook that will be used is the Macmillian/McGraw-Hill series. Our science class will consist of reading, lecturing, note taking, labs and discussion. It is important for your child to stay ORGANIZED in science. Note taking is an important skill that your child will be required to perform. Labs are planned to enhance the concept that is presented. Homework is provided to reinforce the topic covered in class. Tests and projects are part of the curriculum to check that the concepts have been understood. Please consult the handbook for the St. John Fisher homework policy.

I look forward to a great school year. If you have concerns or questions, please email me.

Thank you,  
Mrs. Hughes
