## THE ALLERGEN GUIDE

## Notes regarding the Food Product and Allergy Guide

- \* An "x" indicates that the food product contains that particular allergen in the ingredient statement from the manufacturer
- \* It is important to know that we do have products that contain/may contain peanuts or tree nuts in the production facility
- \* Many of the products served contain "soy" as indicated on the chart. In many cases, the soy present is in the form of soybean oil or soy flour
- \* A majority of the products that contain "nitrates or nitrites" contain a B vitamin in the form of thiamin mononitrite or thiamin mononitrate
- \* We strive to continually update this guide, but manufacturers can make formulation changes with no prior notifications to us. Hence, we recommend diligent label-reading from both food servers and parents for all products served to children with allergies.
- \* Product substitutions may be necessary. This should only be used as a guide.
