

## Lesson #15

1. Molly scored 4 goals at her soccer game. That is 3 more goals than she scored last week. How many goals did Molly score last week? Choose the correct equation and solve it.
2. Round 5,767 to the nearest thousand.
3.  $7 \times 6 = ?$
4. 2,076  $\bigcirc$  2,067
5.  $10,994 - 4,887 = ?$
6. One yard (yd) is 36 inches (in.). Write  $1 \text{ yd} = 36 \text{ in.}$  in the box.
7. Write 3,281 using words.
8.  $2,456 + 9,873 = ?$
9. Find the area.
10.  $4 \times 25 = ?$  Use the distributive property.  $4 \times (20 + 5)$
11. The Dollar Theater sold 102 tickets in April, 198 in May, 318 in June, and 182 in July. Did the theater serve more or fewer than 700 patrons? (Use compatible numbers before finding the exact total.)
12. Write and solve a number sentence for *six times as many as 4*.
13. Draw along the dotted lines to divide the square. Shade in one part. What fraction is shaded ?
14. All the models show  $\frac{1}{2}$  shaded.  
Write the equivalent names for the  $\frac{1}{2}$  that are shown.
15. Draw a ray.

1. 4.OA.2 A) $3 + 4 = g$ B) $g + 3 = 4$	2. 4.NBT.3	3. 3.OA.7
